TC3841 with Various JumboSwitch Chassis & Card Cages

Featuring a wide range of advanced networking features, the TC3841 is a 6-Port Gigabit (10/100/1000M) Copper Ethernet Switch. It can also be configured as a 6-Port 10/100 Ethernet Switch as an option.

Advanced networking features include Rate Limiting, VLAN, QOS and Security. Rate Control gives users, especially data service providers, the ability to control or limit bandwidth. For example, rates can be limited to 96Kb, 128Kb, 256Kb, 512Kb, 1Mb, 2Mb, etc. Password protection provides secure user administration via SSHv2, SNMPv3 and other security features.

The TC3841 supports distances up to 100km (single mode laser) and is available with a “one fiber, bi-directional” option to maximize fiber optic cable usage. Diagnostics include Traffic Statistics, Temperature and Power Consumption Monitoring.

Management is through Web Interface, SNMP, TELNET or Serial Console (via Management Card). Configuration settings can be saved and loaded to simplify network administration, and firmware can be remotely upgraded.

The TC3841 interface card can fit into any available JumboSwitch housing options including 25 Standalone chassis and 1U/2U/4U card cages. Power supply options are 12VDC, 24VDC, -48VDC or 115/230VAC. Standard operating temperature is -20°C to +70°C and the extreme temperature version is -40°C to +80°C.

## Applications

With its ability to operate in the harshest of environments and its advanced networking features, the TC3841 is the perfect solution for virtually all Ethernet Switch applications encountered in the Industrial Automation, Utility and Transportation industries. It is also used by Data Service Providers to control the bandwidths they offer to their customers

## Environmental & EMI Compliance

The JumboSwitch product family meets all pertinent industry-specific standards for environmental, performance and security requirements including IEC 61850-3, IEEE 1613, NEMA TS-2 and NERC CIP. Furthermore, future JumboSwitch family products will continue to be compliant with both existing and emerging industry standards and requirements, including developing Ethernet standards.
