## **New 28-Page TC Communications Product Catalog Features 60 Ethernet, Voice & Data Networking Products**

IRVINE, CA---A new 28-page product catalog featuring Ethernet, Voice & Data fiber optic networking products is now available from TC Communications.

This new Product Guide includes benefits, features, specification charts and application diagrams for more than 60 different fiber networking products. Its purpose is to help customers quickly search through different product categories to locate appropriate products for specific applications.

The highlight of the Product Guide is TC Comm's flagship product, the JumboSwitch<sup>®</sup>, an industrial grade (-40°C to 80°C), fully-managed and easily scalable Modular Gigabit Ethernet Switch that integrates up to seven hot-swappable Ethernet, Voice & Data interface cards onto a Gigabit backbone Ethernet fiber optic network.

Product categories include:

- Industrial Gigabit Ethernet Modular Switch Series
- Ethernet Switches & Media Converters
- Redundant Multiplexers/Switches
- Fiber Optic Modems & Multiplexers
- Telephone/Leased Line/Intercom Extenders
- High/Low Speed Mode Converters

#

*Specializing in Fiber Optic Communications networks, TC Communications, Inc. designs and manufactures all types of Industrial Grade Modular Ethernet Switches, Self-Healing Ring Ethernet Switches, Media Converters, Modems, Multiplexers, Telephone/Data Multiplexers and Telephone Extenders.*
